Aeron® Chair

Design Story

Aeron's functionality shows through, contributing to a distinctive look that invites you to sit and experience the chair for yourself. From the transparency of the Pellicle® suspension material to the chair's curvilinear lines, Aeron was designed around people, with Bill Stumpf and Don Chadwick creating an aesthetic all their own. It's no wonder the chair was added to the permanent collection of the Museum of Modern Art™ even before the first one was sold.

Every material, every mechanism on Aeron advances the art and science of seating. The Pellicle seat and back distribute your weight evenly, eliminating pressure points and heat buildup. The Kinemat® tilt allows you to recline fluidly, as your body pivots naturally at the hips, knees, and ankles. And PostureFit® puts support where you need it most while seated—at the base of your spine.

Environmental Data

- 53% Recycled Content
- 50% Post Consumer
- 3% Pre Consumer
- Up to 89% Recyclability*

Life Cycle Assessment Data

- 91 kg CO₂eq Global Warming
- 0.41 kg SO₂eq Acidification
- 0.09 kg Neq Eutrophication
- 4.7 kg O₃eq Smog
- 1536 MJ Primary Energy Demand
- 3.5 X 10⁻⁷ kg CFC-11eq Ozone Depletion

Environmental Certifications

- GREENGUARD Certified
- GREENGUARD GOLD Certified
- BIFMA level™ 3
- Global GreenTag (CM) Certified™ Greenrate Level A

Warranty

Backed by Herman Miller's 12-year, 24/7 warranty

Manufactured

Herman Miller Greenhouse, Holland, MI 49424
ISO 14001/OHSAS 18001
Greenhouse manufacturing facility uses 100% Renewable Electric Energy (through the purchase of Renewable Energy Certificates).

Disclaimer

The PCR this EPD was based on was not written to support comparative assertions. EPDs based on different PCRs or different calculation models may not be comparable. When attempting to compare EPDs or life cycle impacts of products from different companies, the user should be aware of the uncertainty in the final results due to and not limited to the practitioner's assumptions, the source of the data used in the study, and the specifics of the product modeled.

Company Description

Herman Miller creates inspiring designs to help people do great things at work, for learning, for wellness, at home, wherever people are. Our designs and the designers who work with us solve real problems for people and their organizations. This way of thinking about design has led us to be recognized as an innovator in furnishings, personal work accessories, and strategic services.

Our Sustainability Goals

We will be Resource Smart, Eco-inspired, and Community Driven.

Resource Smart

- Zero Waste
- Net Zero Water
- Net Zero Energy

Eco-inspired Design

- All products designed for the environment
- All products BIFMA level 3 certified
- Closed-Loop recycling of used product

Community Driven

- All employees engaged in Earthright
- All suppliers committed to being Resource Smart

LEED

Please refer to www.hermanmiller.com/ecoscorecard for detailed LEED information.

Packaging

Returnable packaging is available for the Aeron Chair.

Supplier Support

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We encourage our suppliers to minimize their operations' environmental impacts and require they assist us in decreasing our facilities' environmental effects.

Design for the Environment Criteria

Our commitment to corporate sustainability naturally includes minimizing the environmental impact of each of our products. Our Design for the Environment team applies environmentally sensitive design standards to both new and existing Herman Miller products, and goes beyond regulatory compliance to thoroughly evaluate new product designs in key areas:

• Material Chemistry and Safety of Inputs

What chemicals are in the materials we specify, and are they the safest available?

• Disassembly

Can we take products apart at the end of their useful life, to recycle their materials?

• Recyclability

Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?

• Life Cycle Assessment (LCA)

Have we optimized the product based on the entire life cycle?

Aeron Chair

MATERIAL DECLARATION

Functional Unit

One unit of seating for one individual, maintained over a 10-year period, including packaging materials used for the final assembled product.

Reference Flow and Product Description

One Aeron Chair (product number AE113AWBPJG) with aluminum base, arms, casters, and Pellicle fabric—intended for use in North America—was modeled for this EPD.

Content Declaration

The chart to the right details the materials included in the product.

.....

Total Material Components

- Aluminum 32%
- Steel 32%
- Plastic 30%
- Foam 4%
- Miscellaneous 1%

| Material | Mass (kg) | Mass (%) | Resource |
|---------------------------------------|---------------|-------------|---|
| Acrylonitrile Butadiene Styrene (ABS) | 0.588 | 3% | Virgin Non-renewable |
| Aluminum | 7.119 | 32% | Recycled Content |
| PA6 (Nylon 6) | 4.478 | 20% | Virgin Non-renewable/ Recycled Content |
| PA6/6 (Nylon 6/6) | 0.126 | 1% | Virgin Non-renewable |
| PBT | 0.008 | 0% | Virgin Non-renewable |
| POM | 0.185 | 1% | Virgin Non-renewable |
| Powdercoat | 0.175 | 1% | Virgin Non-renewable |
| PP (Polypropylene) | 0.367 | 2% | Virgin Non-renewable |
| PU (Polyurethane) | 0.862 | 4% | Virgin Non-renewable |
| Rubber | 0.237 | 1% | Virgin Renewable |
| Steel | 7.075 | 32% | Recycled Content |
| TPE (Thermoplastic elastomer) | 0.749 | 3% | Virgin Non-renewable |
| Zinc | 0.005 | 0% | Recycled Content |
| Total | 21.973 | 100% | |

Packaging*

| | | | |
|----------------------------|--------------|-------------|----------------------|
| Corrugate | 3.529 | 96.63% | Recycled Content |
| PE Bag (Polyethylene) | 0.086 | 2.35% | Virgin Non-renewable |
| PE Film | 0.011 | 0.30% | Virgin Non-renewable |
| PP Banding (Polypropylene) | 0.026 | 0.71% | Virgin Non-renewable |
| Total | 3.652 | 100% | |

*Returnable/reusable shipping blankets also available.

Aeron Chair

LIFE CYCLE ASSESSMENT

ENVIRONMENTAL PRODUCT DECLARATION SYSTEM BOUNDARIES

Cradle to grave, including transportation.

Product

This EPD covers the Aeron Chair produced for use in North America at Herman Miller's GreenHouse manufacturing plant in Holland, Michigan. The EPD applies to all colors of the Aeron Chair with adjustable arms, tilt, aluminum base (both powdercoated and polished base), casters, and suspension seat. The Aeron Chair without arms is excluded from this study.

Raw Material Extraction and Preprocessing

The raw materials stage covers the extraction and production of the raw materials needed to manufacture the product. It includes the processing of the extracted raw material to the point where it can be made into a recognizable part, as well as transportation of the finished raw material to the part production factory.

Production

Materials are converted into parts and assemblies and made into the final product. This stage, often referred to as Gate to Gate, includes packaging of the final product and transport of parts and assemblies to the place of final product assembly and packaging.

Distribution

Transport of the product to the final customer, including retail and warehousing. Herman Miller products generally ship directly from the manufacturing plant to the final customer and are not sent to retail or warehousing.

Usage

Use, maintenance, and regular cleaning of the product. Herman Miller seating products are generally cleaned with a dry or damp rag and do not typically require maintenance during their warranted lifetime.

End of Life

End of life treatment of the product including landfill, recycling, waste-to-energy process, and transportation to the place of final disposal or recycling. We design our products to be easily disassembled and recycled; however, in this study, our product was modeled using the national average recycling values. As a result, more of our materials were modeled as going to the landfill than should occur in actual practice. Herman Miller also offers programs to help our customers find homes for their furniture and materials at end of life.

Aeron Chair

Life Cycle Environmental Impacts

| | Impact Category | Unit | Total | Methodology |
|---|---|------------------------|------------------------|--|
|  | <p>Acidification Potential</p> <p>Atmospheric deposition of substances that can cause a change of acidity in the soil. Changes in levels of acidity can cause a shift of species to occur.</p> | kg SO ₂ -eq | 0.41 | TRACI 2.1 as based on ASTRAP (Shannon 1991, 1992) |
|  | <p>Eutrophication Water</p> <p>Nutrient enrichment of the aquatic environment that impacts its ecological quality of water.</p> | kg nitrogen-eq | 0.09 | TRACI 2.1 as characterized by the Redfield Ratio Model (1963) |
|  | <p>Global Warming Potential (100 Years)</p> <p>A measure of the potential of emitted gasses to cause an increase in the radiative forcing potential of the atmosphere leading to climate change.</p> | kg CO ₂ -eq | 91 | TRACI 2.1 as characterized by IPCC 2001, 2007 |
|  | <p>Photochemical Ozone Creation Potential (Smog)</p> <p>Air pollution derived from man-made emissions to the atmosphere that can potentially cause ground level ozone.</p> | kg O ₃ -eq | 4.7 | TRACI 2.1 as based on Carter, W.SAPRC Atmospheric Chemical Mechanisms and VOC reactivity scale (2010) |
|  | <p>Ozone Depletion Potential</p> <p>Air pollution from man-made emissions to the atmosphere that have the ability to destroy ozone that protects the earth from UV sun-rays.</p> | kg CFC-11 eq | 3.5 x 10 ⁻⁷ | TRACI 2.1 based on Handbook for the International Treaties for the Protection of the Ozone Layer (UNEP-SETAC 2000) |

Aeron Chair

Detailed Life Cycle Impact Assessment

| | LCIA Results | Unit | Total | Raw Material Production | Product Production | Distribution and Retail | End of Life |
|---|---|------------------------|----------------------|-------------------------|----------------------|-------------------------|-----------------------|
|  | Acidification Potential | kg SO ₂ -eq | 4.1x10 ⁻¹ | 2.3x10 ⁻¹ | 1.7x10 ⁻¹ | 3.8x10 ⁻⁴ | 3.4x10 ⁻³ |
|  | Eutrophication Water | kg nitrogen-eq | 9x10 ⁻² | 8.5x10 ⁻² | 3.1x10 ⁻⁴ | 9.6x10 ⁻⁵ | 1.9x10 ⁻³ |
|  | Global Warming Potential | kg CO ₂ -eq | 9.1x10 ¹ | 6.2x10 ¹ | 2.3x10 ¹ | 3.2x10 ⁻¹ | 5.3x10 ⁰ |
|  | Photochemical Ozone Creation Potential (Smog) | kg O ₃ -eq | 4.7x10 ⁰ | 3.0x10 ⁰ | 1.5x10 ⁰ | 4.5x10 ⁻² | 1.1x10 ⁻¹ |
|  | Ozone Depletion Potential | kg CFC-11-eq | 3.5x10 ⁻⁷ | 3.2x10 ⁻⁷ | 2.9x10 ⁻⁸ | 2.2x10 ⁻¹² | 2.9x10 ⁻¹¹ |

Life Cycle Impacts of the Aeron Chair Product

Detailed Life Cycle Assessment

- Raw Material Production
- Product Production
- Distribution and Retail
- End of Life

Aeron Chair**Detailed Life Cycle Inventory**

| LCI Results | Unit | Total | Raw Material Production | Product Production | Distribution and Retail | End of Life |
|--|-------------|----------------------|--------------------------------|---------------------------|--------------------------------|----------------------|
| Energy Demand | | | | | | |
| Primary Energy | MJ | 1.5x10 ³ | 1.1x10 ³ | 3.9x10 ² | 4.5x10 ⁰ | 1.6x10 ¹ |
| Fossil Fuel Energy | MJ | 1.4x10 ³ | 1.1x10 ³ | 3.2x10 ² | 4.5x10 ⁰ | 1.4x10 ¹ |

LCA for Aeron Chair, June 2014

ISO 14025:2006 Environmental labels and Declaration - Type III Environmental Declaration - Principles and Procedures.

PCR REVIEW:

Herman Miller, Inc.

Reference PCR: Product Category Rule for Environmental Product Declaration BIFMA PCR for Seating. Valid through September 30, 2019.

PCR Review was conducted by: NSF International by an LCA expert panel chaired by Tom Gloria, Industrial Ecology Consultants. Email ncss@nsf.org for any PCR questions.

This EPD was based on the June, 2014 LCA for the Aeron Chair. The LCA was independently verified in accordance with ISO 14044 and the PCR by an external reviewer.

This Declaration was independently verified in accordance with ISO 14025 and the PCR.

GREENGUARD Certified
Products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information visit ul.com/gg.

level® Certification
The level conformance mark ensures a comprehensive, independent, and impartial assessment of the environmental and social impacts of a product.
