Environmental Product Summary

Atlas Office Landscape®

Earthright: Herman Miller's Sustainability Strategy

Resource Smart
- Zero Waste
- Net Zero Water
- Net Zero Energy

Eco-inspired Design
- All products designed for the environment
- All products GreenTag™ certified
- Closed-loop recycling of used product

Community Driven
- All employees engaged in Earthright
- All suppliers committed to be Resource Smart

Design Story

Atlas Office Landscape is a work system which brings together height-adjustable and collaborative working in one elegant solution. With a unique 'no beam' structure, your work space is free from unwanted clutter so you can sit or stand in comfort, adapting your posture as you change activity. Atlas can be configured to your work space; its organic design blending seamlessly with the office environment. Make the space your own through desks with collaborative zones, or lockable personal stowage, which work together to create a landscape.
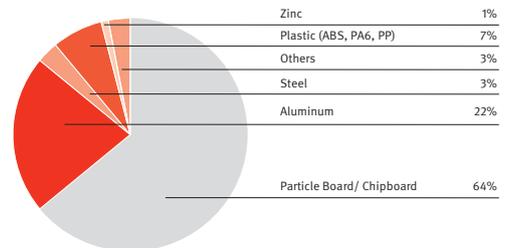

Herman Miller's Design Protocol

Our commitment to corporate sustainability naturally includes minimising the environmental impact of each of our products. Our Design for Environment team (DfE) applies environmentally sensitive design standards to both new and existing Herman Miller products.
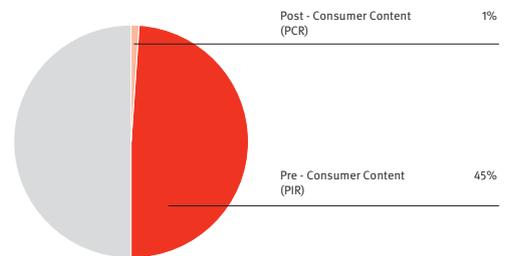

The DfE Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in four key areas:

- Material Chemistry and Safety of Inputs –What chemicals are in the materials we specify, and are they the safest available?

- Disassembly – Can we take products apart at the end of their useful life, to recycle their materials?

- Recyclability – Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?

- LCA – Have we optimised the product based on the entire life cycle?

Materials Content

Zinc	1%
Plastic (ABS, PA6, PP)	7%
Others	3%
Steel	3%
Aluminum	22%
Particle Board/ Chipboard	64%

Recycled Content

Post - Consumer Content (PCR)	1%
Pre - Consumer Content (PIR)	45%

Material Content

Atlas Office Landscape components are constructed from aluminium, steel, plastic (mixed) zinc, particle board / chipboard and other materials.

Atlas Office Landscape is up to 27% recyclable based on the availablility of recycling facilities.

Atlas Office Landscape comprises approximately 45% recycled materials*
- 45% pre consumer
- 1% post-consumer
*based on a freestanding desk.

Herman Miller products can be disassembled with standard tools thereby allowing reuse, refurbishment, repair and recycling of components. Plastic components ≥ 50g are marked with recycling codes where physically possible.

Material Content (continued)

Indoor Advantage Gold certification assures that furniture products support a healthy indoor environment by meeting strict chemical emission limits for volatile organic compounds (VOCs).

Corporate Sustainability Policy

For more information on Herman Miller's Corporate Sustainability Policy and other environmental efforts, please visit: **hermanmiller.com/environment**

The management system governing the manufacture of this product at our Dongguan, China facility is ISO 14001 & ISO 9001 certified site.

This product can help you to achieve criteria towards LEED, BREEAM. Ska and WELL building certifications.

Supplier Excellence

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment.

We operate a successful closed-loop packaging scheme with key component suppliers. Wherever possible we segregate reusable packaging and pass it back to the supplier, who in turn reuses the packaging for future deliveries to Herman Miller.
