

# MADE IN RATIO COWRIE CHAIR AND ROCKER CARE AND MAINTENANCE

## COWRIE CHAIR AND ROCKER

The Cowrie chair and rocker are made from European beech ply and sustainably sourced veneers from Europe and North America. We offer the chair and rocker in ash, walnut or blackened ash. They are finished with a hard-wearing contract-grade clear spray lacquer to ensure durability and ease of maintenance.

Like all natural materials the wood may vary in colour, grain and tone.

## CARE AND MAINTENANCE

For cleaning we recommend using a damp cloth and environmentally friendly cleaning products. Exposure to light can affect the tone and colour of the wood so we advise to keep the Cowrie chair and rocker away from direct sunlight. Maintaining a relative humidity of 35-65 percent is also strongly advised.

The spray lacquer coating is used to highlight and protect the properties of the natural material. To avoid stains and other damage liquids should be wiped clean immediately using a soft cloth. In the case of stubborn stains add a mild detergent to a slightly damp soft cloth.

Wood is susceptible to bruising and scratching from heavy use and movement. The chair and rocker should always be lifted and placed carefully instead of dragged.

For small repairs of stains and minor scratches, rub the surface lightly in the direction of the wood grain using No. 000 steel wool. Apply a scratch-removing polish with a colour and value in keeping with the veneer. If the scratches are deep we advise you consult a professional furniture restorer.
